

Hi, my family and I rely on XM's ability to provide the kind of programming that paying consumers, like us, are very happy to support. We benefit from listening to XM Satellite Radio, and the regular AM/FM stations, for it traffic and weather channels. This is a excellent service that we paid for and it should not be up to the NAB to decide what we are permitted to enjoy with our hard earned money. Respectfully, please reject the NAB petition 04-160 and to support XM's ability to provide the kind of programming that we demand and deserve.
